Creating Picture Filled Letters using Fireworks

Today's Objectives:

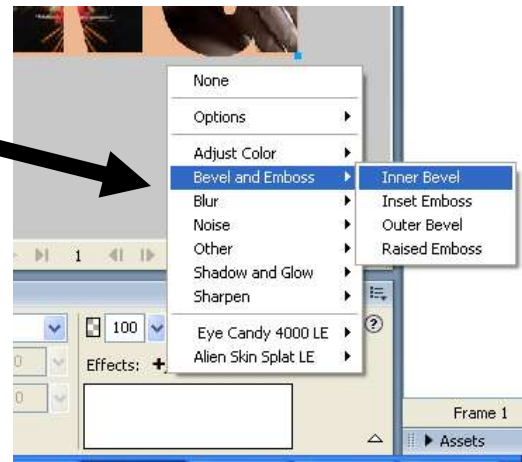

By the end of the assignment:

✓ **I CAN create picture filled letters using the mask function in Adobe Fireworks.**

1. Open a new Fireworks document
Dimensions: W 1200 H 600
Black-canvas color
2. Add a text box, type your first name, use **Impact style font** and enter the font size at least 300 pt. The font color must be **WHITE** or the mask will not work
3. Add images to the canvas to cover each of the letters. Once you have the images where you want them over the letters, you must change the layers to have the text on top of the images.
4. Once the images are aligned properly; Select all layers then, from the menu bar click on **Modify>Mask>Group as Mask** to see images fill the letters

5. Add effect, Bevel and Emboss, Inner Bevel and drop shadow

6. Modify the canvas color to a color that has the most impact with your images and fit canvas so your image is the size of the word

7. Save as ### last name, first name- Mask and save again as a .JPEG

8. Turn in only the .JPEG version
