### Translating and Solving Equations

Learning Target: I can translate and solve one and two step equations

|  |  |
|--|--|
| A number increased by 4 is 12.                       | The sum of 23 and a number is 23.        |
| A number minus 6 is 10.                              | 9 more than 2 times a number is 15.      |
| Six times a number decreased by 6 is 48.             | Twelve less than 5 times a number is 38. |
| Eight times a number minus 2 equals 94.              | The sum of 21 and twice a number is 69.  |
| The difference of triple a number and three is five. | Eleven times a number added to 5 is 16.  |
