

Rouge Education Project

Would you like to learn more about the Rouge River and take part in a hands-on scientific exploration at Ford Field Park?

Some of the activities you will participate in are:

- ❖ Inspecting the Ph of water to determine its quality, through samples taken from the stream.
- ❖ Biological and physical qualities of the water around the banks of the river.
- ❖ Provide awareness to take action and protect the river and its ecosystem based on the results.
- ❖ Experience our natural environment with the help and aid of the "Friends of the Rouge!"

If you answered yes then see Mr. Baiz or Mrs. Savage for an application.
