

STEP 3: What do we do next? (Add a step to your equation).

multiply by 10

STEP 4: Solve your equation.

$$\begin{aligned} & 10 \times (210 + 13) \\ &= 10 \times 223 \\ &= 2,223 \end{aligned}$$

Words	Expression	Solve
d. 12 times the sum of 140 and 210	$(140 + 210) \times 12$	$350 \times 12 = 4200$

STEP 1: Look at the symbols. What are the words for what we have to do?

(Hint: What word means \times ? What words means $+$?)

STEP 2: What do we do first? (The first step goes in parentheses).

$$(\underline{140} + \underline{210})$$

STEP 3: What do we do next? (Add a step to your equation).

multiply by 12

STEP 4: Solve your equation.

$$\begin{aligned} & (140 + 210) \times 12 \\ &= 350 \times 12 \\ &= 4200 \end{aligned}$$
