the brightest
planet.
We can often
see Venus in
the sky, even
during the day!

Venus

Venus is
the brightest
planet.
We can often
see Venus in
the sky, even
during the day!

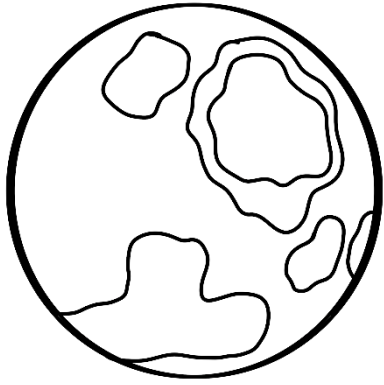

Earth

Earth is our
planet!
It is the
only planet
with
living things
on it.

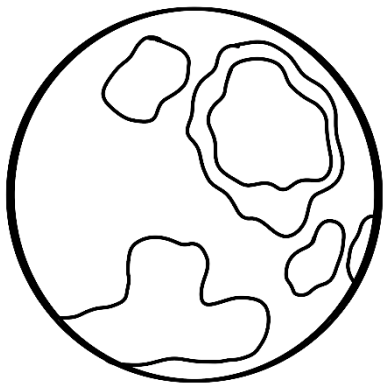

Earth

Earth is our
planet!
It is the
only planet
with
living things
on it.

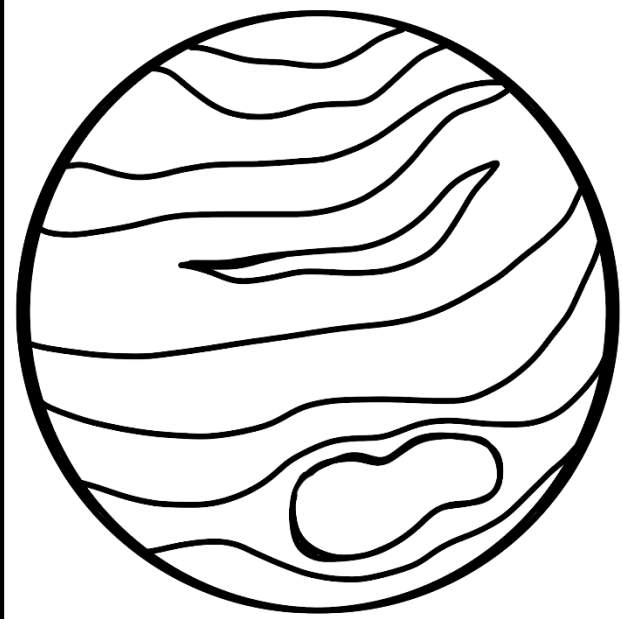

Mars

Next is the planet Mars. It is called the red planet. It has many craters on it where asteroids have hit it.

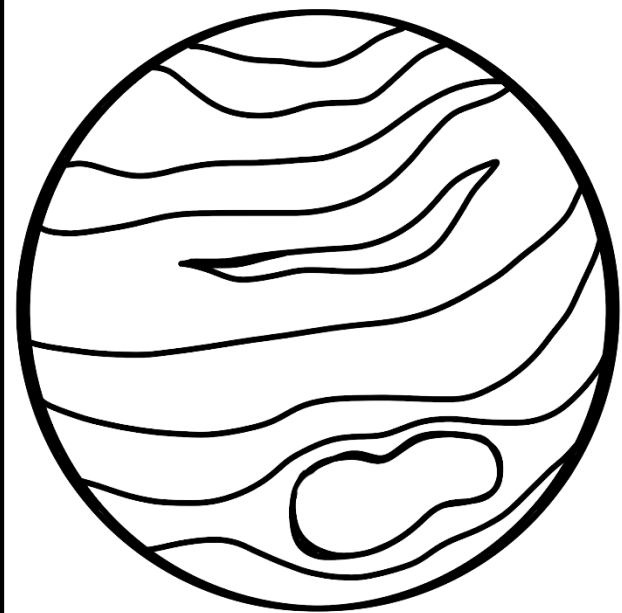

Mars

Next is the planet Mars. It is called the red planet. It has many craters on it where asteroids have hit it.

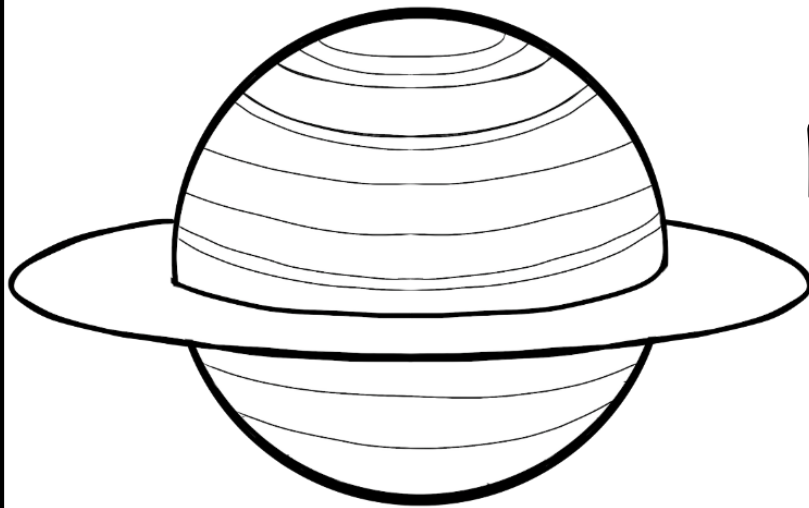

Jupiter

Jupiter is the biggest planet. Jupiter has the **Great Red Spot**, which is a big moving area of storms.

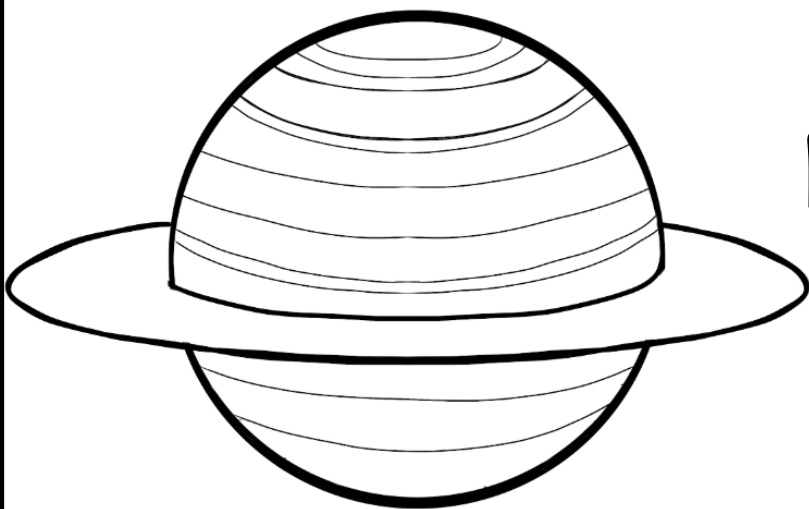

Jupiter

Jupiter is the biggest planet. Jupiter has the **Great Red Spot**, which is a big moving area of storms.

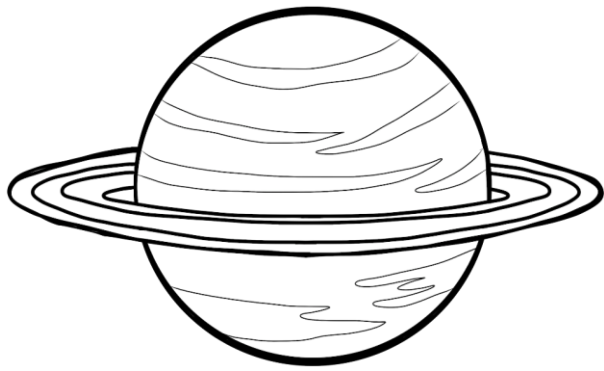

Saturn

Saturn is the sixth planet from the sun. It has big rings which may be made of ice.

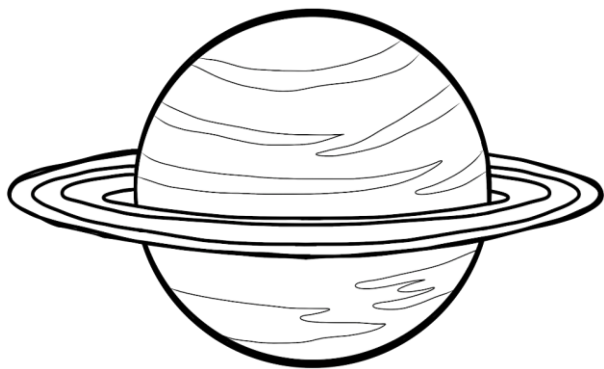

Saturn

Saturn is the sixth planet from the sun. It has big rings which may be made of ice.

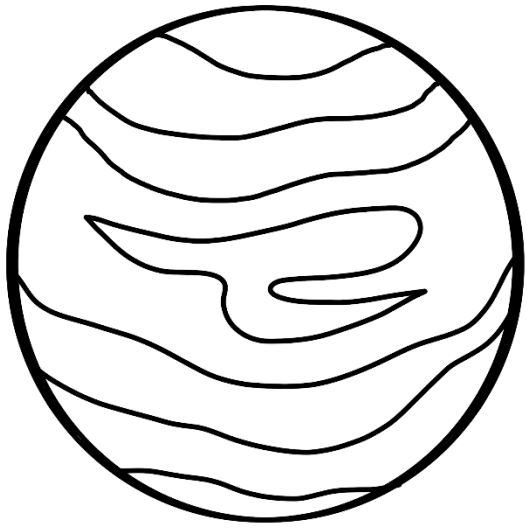

Uranus

The planet
Uranus is blue.
It has rings,
like Saturn.
It is not as
big as Saturn.

Uranus

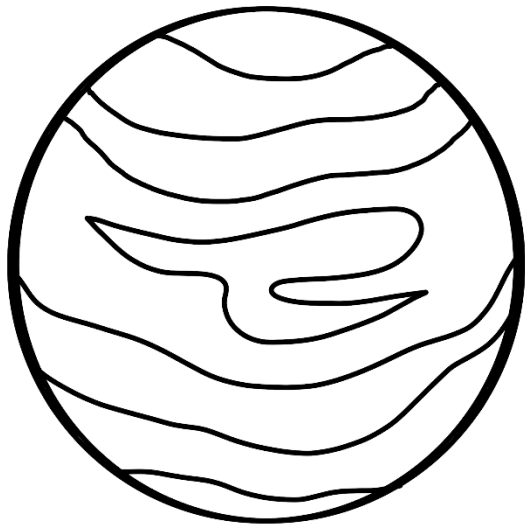

The planet
Uranus is blue.
It has rings,
like Saturn.
It is not as
big as Saturn.

Neptune

Neptune is blue,
just like
Uranus.

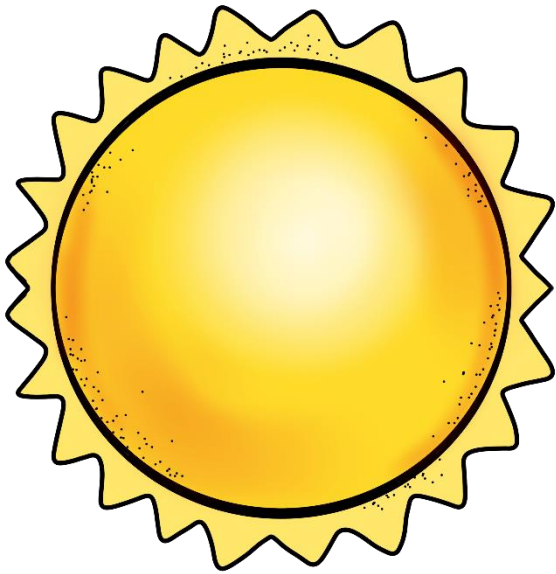

You have to
use a telescope
so you can see
it in our sky.

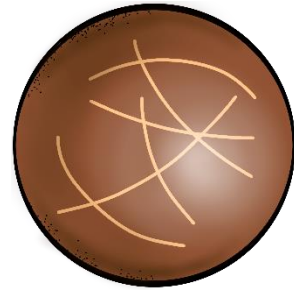

Neptune

Neptune is blue,
just like
Uranus.

You have to
use a telescope
so you can see
it in our sky.

Sun

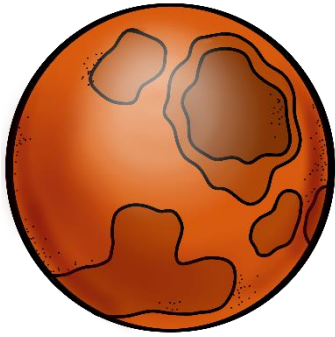

Mercury

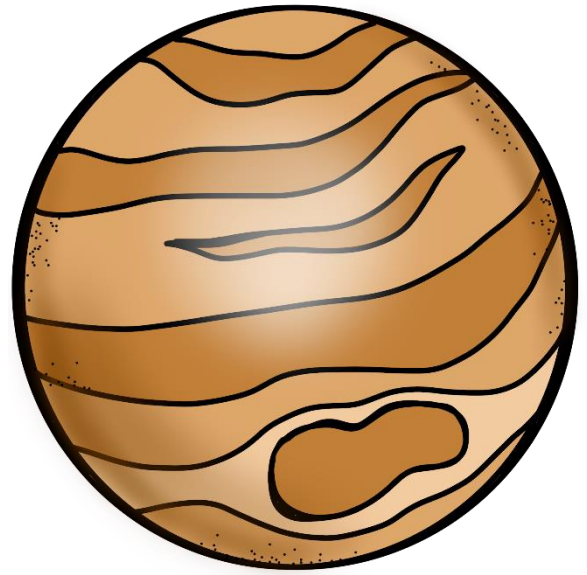

Venus
