

Week of March 30th - April 3rd, 2020

Note: This is only a recommendation. If your circumstances do not allow for this, for whatever reason, I just ask that you find time to have your kiddo read a book, write about it, and work on math. Any little bit will help, but we want to keep up our kid's education as best as we can, especially since this could go on longer than anticipated. Thank you! Please contact me if you have any questions. If you need more, please check out the google doc I posted with more free resources!

### Reading

- Lalilo.com (phonics) or
- Raz-Kids 15-30 minutes daily
- Scholastic – week 3  
<https://classroommagazines.scholastic.com/support/learnathome/grades-prek-k-week-3.html> or
- Read 15 minutes any book(s) of interest daily

### Writing (about what you read, choose one option)

- Informational: Tell me what you learned about! (or whatever book you read)
  - Include a topic sentence. For example: I learned about rabbits/My topic is the Moon.
  - Include 3 sentences about your topic. Each sentence should start after your 1st sentence (not necessarily on a new line).
- Opinion: Tell me your favorite \_\_\_\_\_ about the book (character, part, picture...etc)
  - Include topic sentence: My favorite part/character/picture in the book \_\_\_\_ (title) is \_\_\_\_\_.
  - Tell 2-3 reasons why.... I liked that character/part/picture because \_\_\_\_\_. I also like that \_\_\_\_\_. Lastly I liked/felt \_\_\_\_\_.
- Narrative: Write a similar story with a beginning, middle, and end
  - Include character(s)
  - Include setting
  - Include problem/solution OR adventure
- Looking for capital letters at beginning, punctuation at end, spaces in between words. Sentences should come after each period (not start on a new line)
- Words do not need to be spelled correctly - inventive spelling or phonetic spelling helps students make the connection between letters and their sounds :)
- Please make sure this is your child's work. Let them write it and take ownership of their work.

## Math

- Zearn (highly recommend) or
- Splashlearn: 15-30 minutes daily
- Math PDF worksheets that are uploaded
- When story problems are solved (may or may not be some for the day):
  - Include number bond for each problem
  - Include picture for each problem
  - Include number sentences for each problem

■  $\underline{\quad} + \underline{\quad} = \underline{\quad}$

■  $\underline{\quad} = \underline{\quad} + \underline{\quad}$
