

The box plots below display the distributions of monthly temperatures for 2 cities.

Based on the box plots, answer the following questions or indicate that you do not have enough information.

1. Which city, A or B, has a higher percentage of temperatures greater than 80 °? Explain your choice.
2. Which city, A or B, has a higher percentage of temperatures less than 60 °? Explain your choice.
3. Which city, A or B, has a higher percentage of temperatures above 70° ? Explain your choice?
4. Which city, A or B, has the most 50° days? Explain.
5. Write 2 -3 sentences comparing the temperature of city A and B in respect to which is the warmest.
