The distance walked for classes of 20 students that participated in a walkathon are shown below.

- 6. Which class tended to have the highest typical distance walked? Explain your choice.
- 7. Without calculations, which class has the highest variability? Explain your choice.
- 8. Which measure of variability would you use to describe the Junior class, standard deviation or IQR? a. Explain your choice.
  - b. Find the appropriate measure.
- 9. Which measure of variability would you use to describe the Senior class, standard deviation or IQR? a. Explain your choice.
  - b. Find the appropriate measure.
- 10. What are the mean and median of data sets used to compare?
- 11. What are the IQR and Standard Deviation of data sets used to compare?
- 12. Find the standard deviation of the data set by hand. Round to the nearest thousandth.
