

5. Tally the data, placing it into the proper class.

7-18	HHH 1	← meaning 6 of the 50 people surveyed spent 7-18 min on internet
19-30	HHH HHH	
31-42	HHH HHH III	↖ * These tally mark #'s will represent the <u>heights</u> of the bars on your histogram
43-54	HHH III	
55-66	HHH	
67-78	HHH 1	
79-90	II	

6. Draw the histogram.
Internet Usage

break in graph because data doesn't start at 0 on the x-axis

- Put a title on it
- Label each axis completely
