7. $\sin \theta = \dfrac{-12}{13}$ and $\tan \theta$ is positive.

8. $\tan \theta = \dfrac{4}{9}$ and $\cos \theta$ is positive.

9. Given $\sin \theta = \dfrac{-4}{5}$, what are all possible values for $\cos \theta$ and $\tan \theta$?

10. Given $\tan \theta = \dfrac{3}{4}$, what are all possible values for $\cos \theta$ and $\sin \theta$?
