

Solve each system of equations algebraically.

①  $x^2 - y = 3$   
 $2x - y = 3$

②  $y = x^2 + 4x - 2$   
 $y = 6x - 3$

③  $y = x^2$   
 $3x = y + 2$

④  $x^2 + y = 5$   
 $-y = x - 3$
