

Trigonometry Ratios

Find the value of each trigonometric ratio.

1) $\tan Z$

2) $\sin A$

3) $\tan A$

4) $\sin C$

5) $\cos A$

6) $\cos C$

7) $\tan X$

8) $\tan A$

9) $\sin C$

10) $\sin X$

For 11-14 sketch the $\angle$. Then find its reference $\angle$.
Lastly, draw and label (completely) the reference Δ .

11. $\theta = 210^\circ$

12. $\theta = -315^\circ$

13. $\theta = 120^\circ$

14. $\theta = -45^\circ$
