

Stats  
Ch 2  
Sec 2.3

p. 74-78

13-16, 20, 23, 31, 37-40, 49

\* Make tables for #11-44, 47  
weighted + grouped mean for

**Graphical Analysis** In Exercises 9–12, determine whether the approximate shape of the distribution in the histogram is symmetric, uniform, skewed left, skewed right, or none of these. Justify your answer.

**Matching** In Exercises 13–16, match the distribution with one of the graphs in Exercises 9–12. Justify your decision.

13. The frequency distribution of 180 rolls of a dodecagon (a 12-sided die)
14. The frequency distribution of salaries at a company where a few executives make much higher salaries than the majority of employees
15. The frequency distribution of scores on a 90-point test where a few students scored much lower than the majority of students
16. The frequency distribution of weights for a sample of seventh grade boys

## Using and Interpreting Concepts

**Finding and Discussing the Mean, Median, and Mode** In Exercises 17–34, find the mean, median, and mode of the data, if possible. If any of these measures cannot be found or a measure does not represent the center of the data, explain why.

20. **Cholesterol** The cholesterol levels of a sample of 10 female employees

154 240 171 188 235 203 184 173 181 275

23. **Air Quality** The responses of a sample of 1040 people who were asked if the air quality in their community is better or worse than it was 10 years ago

Better: 346 Worse: 450 Same: 244

31. **Weights (in pounds) of Dogs at a Kennel**

1	02	Key: 1 0 = 10
2	147	
3	78	
4	155	
5	07	
6	5	
7		
8		
9		
10	6	

**Finding the Weighted Mean** In Exercises 41–46, find the weighted mean of the data.

*Make a table!!*

- 41. Final Grade** The scores and their percents of the final grade for a statistics student are given. What is the student's mean score?

	Score	Percent of final grade
Homework	85	5%
Quizzes	80	35%
Project	100	20%
Speech	90	15%
Final Exam	93	25%

- 42. Salaries** The average starting salaries (by degree attained) for 25 employees at a company are given. What is the mean starting salary for these employees?

8 with MBAs: \$45,500

17 with BAs in business: \$32,000

- 43. Account Balance** For the month of April, a checking account has a balance of \$523 for 24 days, \$2415 for 2 days, and \$250 for 4 days. What is the account's mean daily balance for April?

- 44. Account Balance** For the month of May, a checking account has a balance of \$759 for 15 days, \$1985 for 5 days, \$1410 for 5 days, and \$348 for 6 days. What is the account's mean daily balance for May?

- 45. Grades** A student receives the following grades, with an A worth 4 points, a B worth 3 points, a C worth 2 points, and a D worth 1 point. What is the student's mean grade point score?

B in 2 three-credit classes

D in 1 two-credit class

A in 1 four-credit class

C in 1 three-credit class

- 46. Scores** The mean scores for a statistics course (by major) are given. What is the mean score for the class?

9 engineering majors: 85

5 math majors: 90

13 business majors: 81

**Finding the Mean of Grouped Data** In Exercises 47–50, approximate the mean of the grouped data.

- 49. Ages** The ages of residents of a town

*Make a table!*

Age	Frequency
0–9	55
10–19	70
20–29	35
30–39	56
40–49	74
50–59	42
60–69	38
70–79	17
80–89	10
