

## **Final Steps for Creating Your Essay**

**Conclusion-**Do not begin your conclusion until you have created your final document and copied and pasted over all of your other paragraphs. Your conclusion should wrap up the paper and be directly connected back to your original claim. Please see conclusion worksheet for more information.

### **Works Cited Page-**

You will need to create a works cited page for any of the sources that you used in your paper. If the only information you got was from the textbook articles, you do not need to make this page.

Please use [www.easybib.com](http://www.easybib.com) to complete this task. I have an example for you on the next page. It cites where I got the information for the Taco Bell paper. Like my example, your Works Cited page must be a separate page at the end of your essay.

### **Quoting and Paraphrasing-**

If you used someone else's words within your paper, either word for word, or paraphrased, you must cite them as a source. Remember to put quotation marks around direct quotes.

### **Font Size and Title-**

For the entire paper you must use Arial or Times New Roman font only. Your font size is 12, throughout the paper, including the title. Do not underline the title.

Yes, your paper must have a title and it cannot be "my argument paper". Come up with something original, that goes with your topic.

**Finally, your paper is due by 8 am on Tuesday, January 16<sup>th</sup>, whether you are in school, or not. Absences on Tuesday, excused or not, will not allow you an extra day.**
