# Classwork 5-30-19
<u>Your Name</u>

</div>

<u>**Today's Objectives:**</u>

By the end of the class period students should be able to say:

1. *I CAN* explain how to and create a frame by frame animation
2. *I CAN* use the text tool, add keyframes, and sound
3. *I CAN* animate an object using the same layer

---

1. **Open up the program Adobe FLASH**

2. **Start a new presentation, change the document size and color**

3. **Save as ### last name, first name-Name**

4. **You are going to create animation using your name. Use the text tool to create a text box with your name in it.**

5. **Add keyframes at different points on layer 1 and change text color, size, and flip it around on each keyframe that you create. Keyframes should be added about every 5 to 10 frames for maximum effect.**

6. **You should have at least 20 different keyframes, not frames. That means that your name should flash in at least 20 different ways.**

7. **Save again and publish**

8. **For extra credit, add a layer and import a sound to play while your name flashes.**

9. **Drop off flash player published copy only**
