

Warm Up:

a. Label the side lengths and the angles in the 30-60-90 triangle below. Find the trig ratios for  $\sin(60^\circ)$ ,  $\cos(60^\circ)$ , and  $\tan(60^\circ)$ .

$$\sin(60^\circ) = \frac{\sqrt{3}}{2}$$

$$\cos(60^\circ) = \frac{1}{2}$$

$$\tan(60^\circ) = \sqrt{3}$$

b. Using the book's glossary, define Reference Angle and Reference Triangle.

(Do this) <sup>5</sup>

1. What is  $\sin(120^\circ)$ ,  $\cos(120^\circ)$ , and  $\tan(120^\circ)$ ?

$$\begin{array}{ccc} \sin(60^\circ) & \cos(60^\circ) & \tan(60^\circ) \\ \frac{\sqrt{3}}{2} & \frac{1}{2} & \sqrt{3} \end{array}$$

$$\begin{array}{ccc} \sin(120^\circ) & \cos(120^\circ) & \tan(120^\circ) \\ \frac{\sqrt{3}}{2} & -\frac{1}{2} & -\sqrt{3} \end{array}$$

\*If we know values for reference angle, then we know for many others.
