L.O.: Students will write how the volume of an irregularly shaped object is measured using the following closed paragraph-

First, I determine the \_\_\_\_\_ of water in the graduated cylinder. Next, I carefully put the \_\_\_\_\_ in the graduated cylinder with the water. Then, I determine the \_\_\_\_\_ of water with the object in the cylinder. Finally, to calculate the volume of the object, I \_\_\_\_\_ the \_\_\_\_\_ volume of water from the \_\_\_\_\_ volume of water in the graduated cylinder. The amount of water displaced is \_\_\_\_\_ to the volume of the irregularly shaped object.
