**Renewable, Non-Renewable, & Human activities**

**For Consumption and Impact on the Environment**

You should use the Green Earth Science Book pages 678-689 and pages 737-747 to begin your study of the following concepts.

In addition, include several scientific Real World examples that are currently occurring to support the ideas in your project.

Presentation Methods: Poster, Brochure, or a PowerPoint. ✓

**OVERVIEW:**

**E2.4 Resources and Human Impacts on Earth Systems**

The Earth provides resources (including minerals) that are used to sustain human affairs. The supply of non-renewable natural resources is limited and their extraction and use can release elements and compounds into Earth systems. They affect air and water quality, ecosystems, landscapes, and may have effects on long-term climate. Plans for land use and long-term development must include an understanding of the interactions between Earth
