

Scientific Method

9/17/14

* For Experiments *

Identify a Problem (usually given)
(an Idea to test, Challenge?, learn More, Prove)

Problem: (Everyone starts w/ this stem)

"The purpose of this experiment is to..."

Compose Hypothesis

(Educated guess about how the)
(Experiment will turn out)
(Based on how you test)
(using Independent!)
(Dependent Variables)

Prove
Demonstrate
test
Reveal
generate
evidence

Stem:

"I think the results of my Experiment
Will..."

Prove
Reveal
Demonstrate
confirm
