

5/31/17

IV Humidity

- a. Heat (Sun heating ground = heating air)
Evaporates $H_2O \rightarrow$ in Air
- b. Amount of H_2O Vapor (Gas H_2O) in Air
- c. Saturated Air $\rightarrow$ (Humid)
 $=$ Water Vapor $\rightarrow$ turns to Liquid H_2O

V Relative Humidity

- a. Definition: The ratio of the amount of H_2O (Moisture) in the air compared to the ~~the maximum~~ Maximum amount Possible

$$\Rightarrow \frac{\text{amt. } H_2O \text{ in air}}{\text{Max. amt Possible } H_2O}$$

VI Forming Clouds

VII Classifying clouds

(Blue Heading)

(RED) A. Shape

- 1.
- 2.
- 3.

(RED) C. Rain/snow clouds

- 1.
- 2.
- 3.

(RED) B. Height

- 1.
- 2.
- 3.
