

Human and Physical Characteristics

Human Characteristics

Human characteristics are things that people build. These characteristics change the way that the land looks.

Here are some
examples of **human**
characteristics.

bridges

buildings

roads

racetracks

parks

houses

Physical Characteristics

Physical characteristics are the natural features of the earth. People did not make them or put them there.

Here are some examples of
physical features of the earth.

mountains

hills

oceans

cliffs

deserts

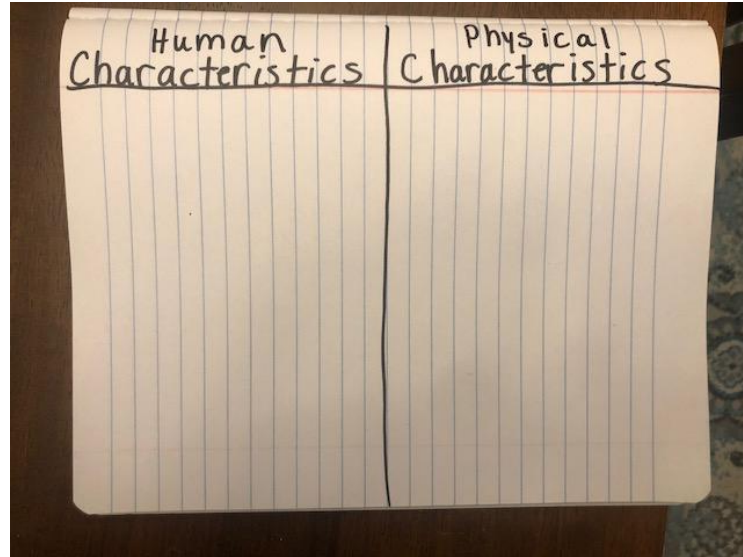

trees

rocks

Make a t-chart in your notebook like this:

Now, you try it!

Record these characteristics on the correct side of your t-chart:

Deserts

oceans

mountains

Streets

rivers

cliffs

Rocks

houses

buildings

Trees

hills

parks
