

KEY CONCEPT OVERVIEW

During the next few days, our math class will explore the addition chart and look for patterns. We will learn to use the addition chart to solve subtraction problems and find related number sentences.

You can expect to see homework that asks your child to do the following:

- Use the addition chart to create and solve related subtraction problems.
- Make subtraction flash cards and number bond cards to play a memory game.

SAMPLE PROBLEM (From Lesson 38)

On your addition chart, shade an addition fact yellow. Then write a related subtraction sentence and its number bond.

$2 + 5$	$2 + 6$	$2 + 7$	$2 + 8$
$3 + 5$	$3 + 6$	$3 + 7$	
$4 + 5$	$4 + 6$		
$5 + 5$			

$$8 - 2 = 6$$

Additional sample problems with detailed answer steps are found in the *Eureka Math Homework Helpers* books. Learn more at GreatMinds.org.

HOW YOU CAN HELP AT HOME

- Play What's the Difference? Partners place a deck of playing cards between them, facedown. Each partner flips over two cards and subtracts the smaller number from the larger number. The partner with the smallest difference keeps all four cards played in that round. The player with the most cards at the end of the game wins. (NOTE: Face cards are equivalent to 10, or you can remove them from the deck before playing. Aces are equivalent to 1.)
- Play a memory game by matching related addition facts with the subtraction cards made for your child's homework.
