

Bellwork Alg 2 Tuesday, April 23, 2019

1. Sketch one period of this Sine function. Label the coordinates of all max, min, and points on the midline.

$$y = 13 \sin(x + \frac{\pi}{6}) + 3$$

2. Write the equation of this transformed Sine function.

ANSWERS

1. Sketch one period of this Sine function. Label the coordinates of all max, min, and points on the midline.

$$y = 13 \sin(x + \frac{\pi}{6}) + 3$$

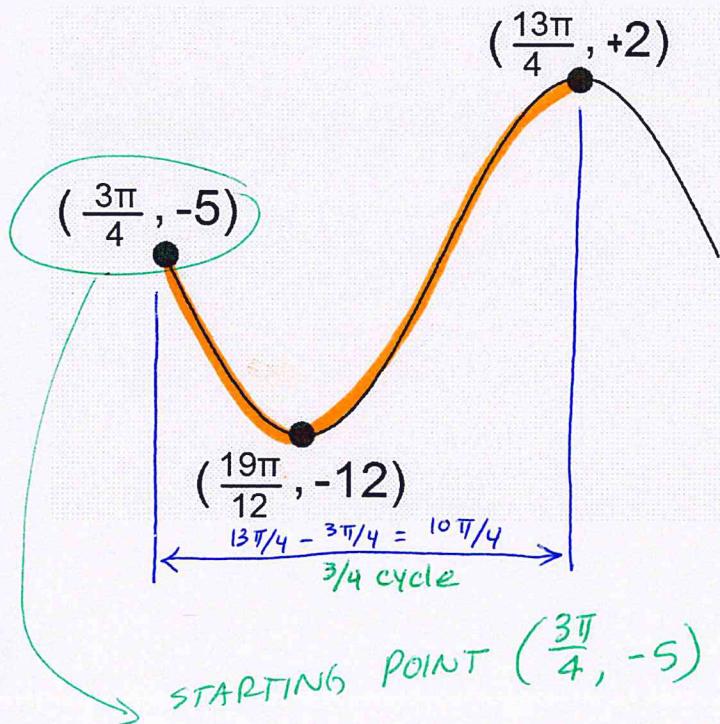

- Amplitude = 13
- Not upside down
- midline: $y = 3$
- period = 2π

• phase shift
 $\frac{\pi}{6}$ Left

starting point
 $(-\frac{\pi}{6}, 3)$

$$\frac{1/4 \text{ of a period}}{2\pi \cdot \frac{1}{4}} = \frac{\pi}{2}$$

2. Write the equation of this transformed Sine function.

$$\text{EQ: } y = -7 \sin\left(\frac{3}{5}\left(x - \frac{3\pi}{4}\right)\right) - 5$$

$$\text{period} = \frac{\frac{10\pi}{4}}{\frac{3}{4}} = \frac{10\pi}{4} \cdot \frac{4}{3} = \frac{10\pi}{3}$$

$$b = \frac{2\pi}{\frac{10\pi}{3}} = 2\pi \cdot \frac{3}{10\pi} = \frac{3}{5}$$

- midline $y = -5$
- Phase Shift: $\frac{3\pi}{4}$ right

$$\text{Amplitude } 2 - -5 = 7$$

- upside down
