

H. Geometry - Bellwork #11

Directions: Match the following terms with their definition.

1. B line segment A. Lines that are coplanar and do not intersect.
2. D perpendicular lines B. Part of a line consisting of 2 endpoints.
3. A parallel lines C. Formed by 2 rays with the same endpoint.
4. C angle D. 2 lines that intersect at a 90-degree angle.

Identify the following from the diagram.

5. Name the plane below: Plane M
ABE

6. Points E, B, and C are coplanar.

Identify the following from the diagram. Make sure you use appropriate symbols and markings.

7. A line \overleftrightarrow{FE}
8. A segment \overline{CD}
9. A ray \overrightarrow{DE}
10. An angle $\angle ADF$
11. Identify 3 collinear points F, D, E

Sketch the following. Mark all congruent angles and segments as well as any right angles.

12. Angle bisector

13. Midpoint of a segment

14. Perpendicular bisector
