

H. Geometry Topic 4—Review

Name: Answers Hour:

1. What is the difference between inductive and deductive reasoning?

inductive: based on observation
deductive: valid reasoning

2. What is the difference between a postulate and a theorem?

postulate is a statement assumed to be true, while a theorem is true and proven.

3. Identify the angles below as: complementary, supplementary, vertical, linear pair,

4. Solve for x.

$$28x - 30 = 140 - 6x$$

$$34x = 170$$

$$x = 5$$

5. Solve for x, DO, and OG.

Given the figure and $DG = 60$ ft.

$$4x - 3 + 2x + 21 = 60$$

$$6x + 18 = 60$$

$$6x = 42$$

$$x = 7$$

$$DO = 25$$

$$OG = 35$$

6. Solve for q.

$$q = 22$$

$$7q - 46 + 3q + 6 = 180$$

$$10q - 40 = 180$$

$$10q = 220$$

$$q = 22$$

7. Solve for x and y.

$$x = 38 \quad y = 25$$

8. In the diagram shown, $\angle 1$ has a measure of 60° .

List the vertical Pairs: $\angle 1$ & $\angle 3$; $\angle 2$ & $\angle 4$

List the linear Pairs: $\angle 1$ & $\angle 2$; $\angle 3$ & $\angle 4$

$$m\angle 1 = 60^\circ$$

$$m\angle 2 = 120^\circ$$

$$m\angle 3 = 60^\circ$$

$$m\angle 4 = 120^\circ$$

9. Solve for x.

$$x = 35$$

$$3x + 2x + 5 = 180$$

$$5x = 175$$

$$x = 35$$

10. Solve for x. Find the $m\angle 2$ and $m\angle 3$.

$$x = 58$$

$$m\angle 2 = 75^\circ$$

$$m\angle 3 = 105^\circ$$

$$2x - 11 = 105$$

$$2x = 116$$

$$x = 58$$

11. Look carefully at the pattern. Which of the 4 shapes below would complete the pattern?

Write a proof (with statements and reasons) for solving each of the equations below.

Use a 2-column proof—it is easier to organize from scratch. You may not need all the lines provided for the proof.

12. Given: $4x = 12x + 32$

Prove: $x = -4$

Statements	Reasons
$4x = 12x + 32$	Given
$-8x = 32$	subtr prop.
$x = -4$	division prop.

13. Given: $\frac{1}{4}x + 10 = 2$

Prove: $x = -32$

Statements	Reasons
$\frac{1}{4}x + 10 = 2$	Given
$\frac{1}{4}x = -8$	subtr prop.
$x = -32$	mult. prop.

14. Given: $-3(x+2) = 16 - x$

Prove: $x = -11$

Statements	Reasons
$-3(x+2) = 16 - x$	Given
$-3x - 6 = 16 - x$	Dist. prop.
$-2x - 6 = 16$	add. prop.
$-2x = 22$	add prop.
$x = -11$	division prop.
