Textbook:

Michigan Citizenship Collaborative Curriculum

Geography Alive! Regions and People

World Explorer People, Places, and Culture

Supplementary Resources: Discovery Education Videos and Media Center for Research

Course Description:

Sixth Grade Global Studies will explore and categorize major geographical features and natural resources that contribute to the uniqueness of each continent. We will examine how these features influence human migration and settlement. We will also analyze the connections between the past and present in the development of culture, economics, and government.

Course Objectives:

- To review the earth's processes/physical features and how our lives are affected by it
- To review the 5 basic themes of geography
- To review the basic systems of economics and government
- To analyze human migration and the influence of natural disasters
- To investigate global issues and apply skills of geographic inquiry
- To foster an understanding and appreciation of the world and cultural diversities

Materials:

- A binder with pockets
- 5 tab writable dividers
- Pencil case- ink pens (blue, black, red), highlighter, color pencils
- Subscribe to blog or remind/ always have planner
- Submit signed syllabus
