

Interactive Notebook p. 3

Spatial Scales

1. Draw a small circle in the center and 6 more circles around it . It should look like a bullseye target with 7 circles.

2. Label the center circle with your street address. Label each circle and keep expanding outward until your 7th circle is labeled Earth.

3. Color the local circle(s) yellow, color the regional circle(s) orange, color the national circle(s) red and leave the global circle(s) white

On the back of page 3 explain why you choose to color what circles with what colors; your circles might be different from other students in the room.
