

## City of Dearborn Fire Safety Education Program

The City of Dearborn offers a free, comprehensive instructional safety program through the Dearborn Fire Department's Fire Safety House, 19750 Outer Drive.

This unique training facility is designed to teach children important escape tactics by simulating an actual fire in the home. The program incorporates classroom instruction on what to do in the event of a fire, a question-and-answer period and an opportunity to practice escape techniques in the fire safety house where "safe" smoke and flashing lights create the illusion of an actual home fire in progress.

We stress that the smoke utilized in the fire safety-training program is safe. However, if your child has asthma or other respiratory problems, we suggest that his or her participation in the program be limited to classroom instruction.

We hope that you are in full agreement that the purpose and format of this potentially life-saving program will be beneficial to all concerned. Please check the appropriate box and sign the permission form below so that we may complete schedules for training sessions.

John B. O'Reilly, Jr.  
Mayor

Joe Murray  
Fire Chief
