

Bryant Middle School Science Fair – May 2020

The Science Fair project is a mandatory assignment for all Bryant Middle School 7th grade students. It will be a summative grade for the 4th marking period. A science fair rubric will be used to grade the final project. Students must present their science fair project to their class. The evening science fair competition is optional.

Many students would like to work with another student to complete their project. This may entail many days of working together at one house or another or together at an alternate location such as the library. Parents may need to assist in transporting students to and from an alternate location to complete their work.

Please talk to your child about topic ideas for a science fair project. Also, discuss their partner choice to make sure you feel it would be a cooperative working partnership. And keep in mind that students may work independently if they like.

Please return the following to be approved for a topic by January 31st, 2020.

Name- _____ Hour _____ Science Teacher _____

Partner- _____ Hour _____ Science Teacher _____

Question- (What is the question you are trying to learn about by completing your experiment?)

Hypothesis-(Remember to use "If _____, then _____".)

Explain how hypothesis will be tested- (Describe how the experiment will be completed.)
