

Absolute Location

Absolute Location

Places that have an address or building number are places with an **absolute location**.

These places have definite locations and they do not move.

Here are some examples of places with absolute locations:

- House
- School
- Post office
- Kroger
- Police Station
- Dentist Office

Here are non-examples of places with an absolute location:

Trees

Flowers

Cars

Tents

Let's determine whether these are examples or nonexamples of places with absolute locations. Simply say **Yes** or **No**.
