

## BELUGA WHALE BORN

Whisper and Her Calf

An aquarium in Atlanta, Georgia, made an exciting announcement!

The Georgia Aquarium announced the birth of a beluga whale calf. Whisper, a 20-year-old beluga whale, gave birth to the calf on May 17. Beluga whales are small, white whales that live in cold water. Most wild beluga whales live in the Arctic Ocean. Workers at the Georgia Aquarium are caring for Whisper and her calf. The aquarium is closed because of the coronavirus, but people can follow the aquarium's social media pages to learn more about the calf. A TV special about the new calf will be on Animal Planet on May 30.
