3. Explain how this vertical number line can be used to show that 35,124 rounds 35,000 when rounding to the nearest thousand.

36,000

35,500

• 35,124
35,000

35,124 is 124 away from 35,000 which makes it closer to round to.

4. 51,988 rounded to the nearest ten thousand is **50,000**.

60,000

55,000

• 51,988
50,000

---

5. Round 765,903 to the given place value:

Thousand	765,903 ≈ **766,000**
Ten thousand	765,903 ≈ **770,000**
Hundred thousand	765,903 ≈ **800,000**

---

6. There are 598,500 Apple employees in the United States. Round the number of employees to the given place values.

Thousand	598,500 ≈ **599,000**
Ten thousand	598,500 ≈ **600,000**
Hundred thousand	598,500 ≈ **600,000**

---

7. Complete each statement by rounding the number to the given place value.

a. 783 rounded to the nearest hundred is **800**.

c. 951,194 rounded to the nearest hundred is **951,200**.
