

Name: _____ Hour: _____ Date: _____

Confection Connection

This activity gives you the opportunity to make observations. Remember that observations are based on using your five senses and should be based on fact rather than opinion. You will be finding qualitative data as well as quantitative.

Part One: After the candy is distributed, complete the following: Use only your sense of touch at first. Record your observations below!

- **Sense of Touch:** Describe what you feel.

- **Sense of Hearing:** Listen as you unwrap the object. Describe the sound.

- **Sense of Smell:** Describe what you smell.

- **Sense of Sight:** Describe what you see.

- **Sense of Taste:** Put the object on your tongue. Describe its taste.

- UNLESS OTHERWISE DISCUSSED NEVER EAT IN SCIENCE CLASS

Part Two

Draw a detailed drawing of your object. Measure your drawing in centimeters. Include the measurements on the drawing. Count the stripes on the candy.

Width-_____

Diameter-_____

Number of stripes-_____

Part Three:

Pretend that you are describing this mystery "object" to a young child. Write a paragraph describing the "object" as best you can without saying its name. Use a both qualitative and quantitative data in the paragraph. Write neat.

The object I am thinking of _____
