

Nonmetals are also dull, they do not reflect light like metals do and often appear duller in color.

Nonmetals are also very poor conductors, and do not transfer heat, electricity, or other energy well. Many properties of nonmetals are simply the opposite of the properties of metals! **Nonmetals are found on the right side of the Periodic Table** and more than half of the elements are nonmetals. Most nonmetals are gases at room temperature.

the right side of the Periodic Table and more than half of the nonmetals are gases at room temperature.

and nonmetal properties. Metalloids can be found on the “zigzag” part of the Periodic Table.
