

Test corrections

1. Write the question number and question that you got wrong.
2. Write the correct answer WITH AN EXPLANATION

Example

7. Carbon exists in all four of Earth's systems; limestone contains carbon. This is an example of carbon existing in the _____.

B. geosphere.

limestone is a kind of sedimentary rock, and sedimentary rock belongs in the geosphere because the geosphere is Earth's surface down to its center. So if carbon is in limestone it is also in the geosphere.
