

Groundwater and Precipitation	1
Groundwater storage	2
The Zone of Saturation	3
Groundwater movement	4
Springs	5
Temperature of Springs	6

Follow the directions for each page.
Information is not available in the orange book. p. 252-258 in the green text.

EACH page needs a colored, detailed and labled picture.

1. Define infiltration

2. Explain porosity in relation to ground water.

3. -Define zone of saturation, water table, zone of aeration
-Explain what a water table is.

4 Define permeability and aquifer.

5.-Define spring
-How can the relative positions of an aquifer and aquiclude result in the presence of a spring?

6.-Describe a hot spring
-How does the water in a hot spring get hot?
