

Name _____

Date _____

Main Idea _____

Details _____

Runoff

Use with page 225.

- condensation
- precipitation
- infiltrates

- groundwater
- transpiration
- ocean

- land
- evaporation
- runoff

Draw the hydrologic cycle. Include all of the terms listed below.
Use Figure 9.1 to help you.

Stream Systems Watersheds and Divides

Use with pages 226–227.

Predict how different variables impact whether precipitation will seep into the ground or become runoff.

	seep into ground	become runoff
vegetation		
rate of precipitation		
soil composition		
slope		

Sequence the steps in the development of a stream.
