

Tell if each pair of lines is parallel or not.

1.

$$y = 4x - 5$$

$$y = 5 + 4x$$

2.

$$y = -3x + 7$$

$$y = 3x - 2$$

3.

$$y = 4x - 1$$

$$y = 4$$

4.

$$y = -2x + 15$$

$$6x + 3y = 45$$

5.

$$x = 4$$

$$y = 4$$

6.

$$12x + 8y = -32$$

$$-36x - 24y = 48$$

7.

$$y = 8x$$

$$8x + 2y = 10$$
