

Algebra 1 Bellwork Wednesday, September 17, 2014

Find the slope of the line in each graph. Give fractional answers in reduced form.

1. $m =$

2. $m =$

3. $m =$

4. $m =$

Graph each inequality on a number line.

5. $p > -4$

6. $M \leq 6$

7. $2 < w$

Solve each equation. Show your work.

8. $x - 6 = -16$

9. $\frac{w}{5} = 20$

10. $-8c = 48$

11. $\frac{4}{9}m = -12$

12. $-p = 50$

Algebra 1 Bellwork Wednesday, September 17, 2014

Find the slope of the line in each graph. Give fractional answers in reduced form.

Graph each inequality on a number line.

Solve each equation. Show your work.

8. $x - 6 = -16$
 $+6 \quad +6$
 $x = -10$

9. $\frac{5}{5} \cdot \frac{w}{5} = 20 \cdot 5$
 $w = 100$

10. $\frac{-8c}{-8} = \frac{48}{-8}$
 $c = -6$

11. $\frac{4}{9}m = -12$
 $\frac{9}{4} \cdot \frac{4}{9}m = -12 \cdot \frac{9}{4}$
 $m = -27$

12. $\frac{-p}{-1} = \frac{50}{-1}$
 $p = -50$
