Graph each line using at least 3 points.

1. $y = -\frac{1}{4}x$

2. $y = -3x + 4$

3. $x = -4$

4. $y - 2 = 3(x + 1)$

5. $10x - 4y = 20$

6. $4y = 12$

Graph each line using at least 3 points.

1. $y = -\frac{1}{4}x$

2. $y = -3x + 4$

3. $x = -4$

4. $y - 2 = 3(x + 1)$

$(-1, 2)$
 $m = 3$ or $y = 3x + 5$

5. $10x - 4y = 20$

$x\text{-int} = 2$ or $y = \frac{5}{2}x - 5$
 $y\text{-int} = -5$

6. $4y = 12$

$y = 3$
