Evaluate each expression for $A = -4$, $B = -3$, $C = 5$

1. $B^2 - AC$

2. $-A + 2B$

5. $3AB + 2C^2$

Simplify each.

6. $5K - 2K^2 + 6 - 8K - 3K^2 + 4K(K - 2)$

5. $3a^2b - 4ab + 3a^2b^2 - 7ab^2 + 9a^2b^2 - 6ab + ab^2$
