

1. State the Domain and Range using inequalities.

Domain: $x \geq -2$

Range: $-3 \leq y < 1, y \geq 1$

8. Solve. $30 < 2x - 5 \leq 41$

$$+5 \quad +5 \quad +5$$

$$\frac{35}{2} < \frac{2x}{2} \leq \frac{46}{2}$$

$$(17.5 < x \leq 23)$$
