1. Graph one period of this Cosine Function. Label the coordinates of all Maximums, Minimums, and x-intercepts.

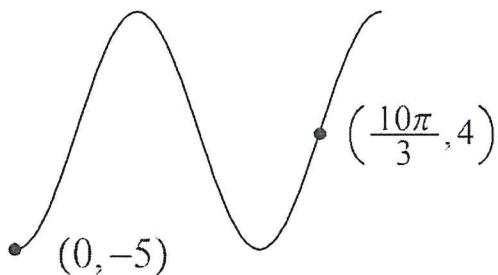

$$y = 10\cos 12x$$

2. Write the equation of each Cosine Function1.

a)

b)

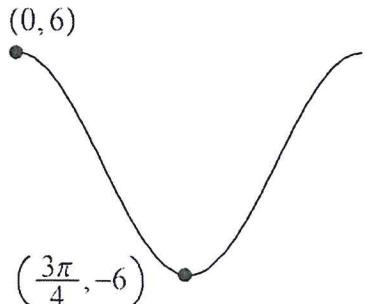

Hon Alg 2 Bellwork Tuesday, May 23, 2017

1. Graph one period of this Cosine Function. Label the coordinates of all Maximums, Minimums, and x-intercepts.

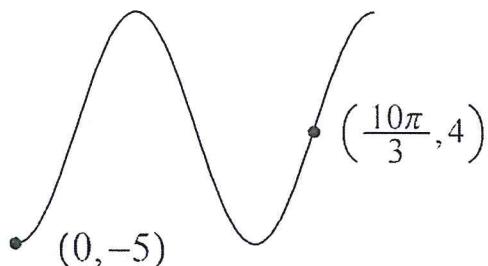

$$y = 10\cos 12x$$

2. Write the equation of each Cosine Function1.

a)

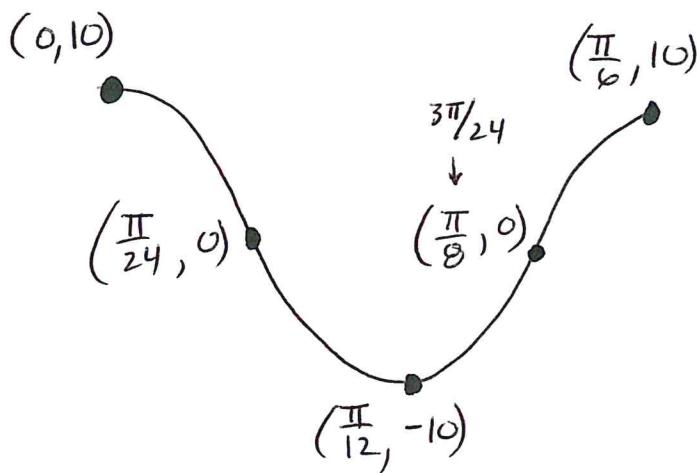

b)

$$\textcircled{1} \quad y = 10 \cos 12x$$

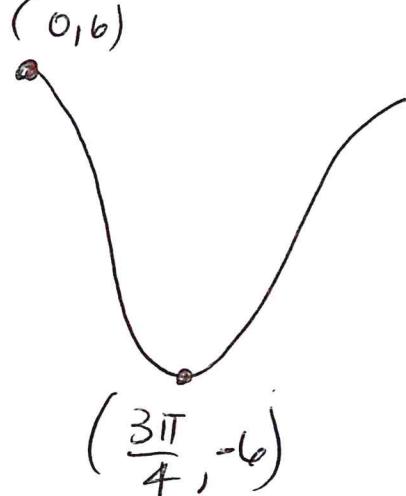

Amplitude = 10

$$\text{Period} = \frac{2\pi}{12} = \frac{\pi}{6}$$

(2)

a)

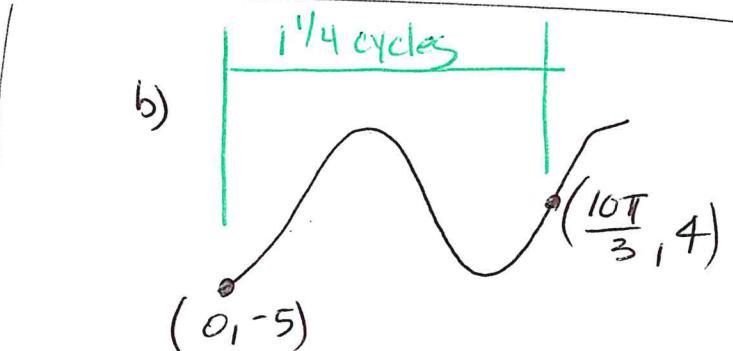

- Amplitude = 6

$$\bullet \text{Period} = \frac{3\pi}{4} \times 2 = \frac{3\pi}{2}$$

$$\bullet b = \frac{2\pi}{\frac{3\pi}{2}} = 2\pi \cdot \frac{2}{3\pi} = \frac{4}{3}$$

$$y = 6 \cos\left(\frac{4x}{3}\right)$$

b)

- upside down
- Amplitude = 9
- midline: $y = 4$

$$\bullet \text{Period} = \frac{\frac{10\pi}{3}}{\frac{5}{4}} = \frac{10\pi}{3} \cdot \frac{4}{5} = \frac{8\pi}{3}$$

$$b = \frac{2\pi}{\frac{8\pi}{3}} = 2\pi \cdot \frac{3}{8\pi} = \frac{3}{4}$$

$$y = -9 \cos\left(\frac{3x}{4}\right) + 4$$
