

Use each given property to make a conclusion:

1. Transitive Property: If $\overline{AB} = \overline{RQ}$ and $\overline{RQ} = \overline{ST}$ and $\overline{ST} = \overline{WX}$, then

$$\overline{AB} = \overline{WX}$$

2. Symmetric Property: If $\overline{GH} \cong \overline{MN}$, then

$$\overline{MN} \cong \overline{GH}$$

3. Subtraction Property of Equality: If $m\angle ABC + 45^\circ = 110^\circ$, then

$$m\angle ABC = 65^\circ$$

4. Substitution Property: If $m\angle EFG = 20^\circ$
and $m\angle EFG + m\angle GFK = 165^\circ$, then

$$20 + m\angle GFK = 165$$
