

1. Use $\triangle JKL$ shown.

a. What angle is included between \overline{JK} and \overline{KL} ?

b. What angles include \overline{JL} ?

c. What sides include $\angle J$?

d. What side is included between $\angle L$ and $\angle K$?

2. The two triangles shown are congruent. Give reasons for each statement then fill in the congruence statement.

Given: $\overline{EM} \parallel \overline{WR}$

1. $\overline{EM} \parallel \overline{WR}$ and $\overline{EM} \cong \overline{WR}$ Reason:

2. $\overline{EW} \cong \overline{EW}$ Reason:

3. $\angle MEW \cong \angle RWE$ Reason:

4. $\triangle \square \cong \triangle \square$ Reason:
