

## Friday, November 17, 2017

- Given a description or scenario, I can write and solve a system of linear equations.
  - I can interpret viable solutions and describe the meaning of the solution in context to the problem.
- 

1) Solve using the quadratic formula:

$$2x^2 + 3x - 20 = 0$$

2) Simplify the following radical:  $\sqrt{50}$

**SLOT QUIZ - Tues., 11/21**
