

# Animals That Dig

by Susan LaBella

Some animals dig holes or tunnels under the ground. The holes and tunnels are called burrows. Many of those animals live in burrows and have babies there.

Moles dig burrows. Moles live in burrows most of the time. They catch earthworms to eat.

Chipmunks dig large burrows. A chipmunk stores food in its burrow.

The chipmunk also makes its nest there. In the winter, groundhogs hibernate in burrows. In the spring, they come out and look for food to eat.

Prairie dogs dig burrows called towns. Groups of prairie dogs live together in these burrows.
