

WHAT

GROWING FOOD AT HOME

Many

people

grow

food

at

home.

They

grow

food

in

gardens.

People

start

growing

food

in

spring.

People

put

seeds

into

dirt.

The seeds

become

plants.

Food

grows

on the plants.

The food may be

green beans,

carrots,

watermelons

or strawberries.

People

wait for the food to be ready.

People

pick the food.

Then

they

eat the food.
