

Examine figure 5, page 7. Identify the nonsilicate mineral classes.

---

---

Look again at figure 5, what do we use native elements for?

---

---

Look again at figure 5, what do we use carbonates for?

---

---

Look again at figure 5, what do we use oxides for?

---

---

Look again at figure 5, compare sulfates with sulfides.

---

---

List 6 properties that help to identify minerals.

---

---

Explain the difference between cleavage and fracture.

---

---

What is the relationship between a mineral's hardness and Mohs scale?

---

---

Examine special properties of minerals. What do you notice?
