

Independent Investigation
Engineering Option
Design Process, Part 4

Name _____

Due Date: _____ Hour _____

As you complete these steps you will work through the steps of the design process that will lead you to the best solution.

The engineering design process steps:

- ☒ Brainstorm possible solutions
- ☒ Evaluate and choose a solution
- ☒ Develop and prototype your solution
- ☒ Test and evaluate your solution
- ☒ solution meets requirements, or
- ☒ Return to process steps for revision

Next let's collect some of the information that you already have that can help you.

A. Copy your engineering project proposal from your defining your problem part 1.

B. List 4 or more possible solutions. Use illustrations,
